DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 8-10, 12-15, and 37-42 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Lim et al.

The Lim reference appears to disclose everything recited in the claims pending here. The inventive entity is not the same as for the case pending here, and the file date of April 2, 2002 is earlier than the foreign priority date for this case as well. See figures 1B, 2B, and 2D for the contact structure, and figure 12 for the array panel structure. Materials and layer thicknesses are noted at for example paragraph [0057] and [0065].
